

UNIVERSITY OF PANNONIA

MULTILINGUALISM DOCTORAL SCHOOL

OPERATIONAL RULES

Date of decision: November 27, 2025

Entry into force: January 1, 2026

Validity: until withdrawal

Responsible person: Dr. Judit Navracics, Chair of TDHT, Head of MDS

Appendix	12

The Doctoral School (hereinafter: DI), based on the position of the University Doctoral and Habilitation Council (hereinafter: EDHT), establishes its internal operational procedures in a manner that effectively serves the high standards of researcher training, the awarding of degrees, and habilitation procedures, and ensures full access for all doctoral students of the DI and all applicants for habilitation to the intellectual potential concentrated within the School and to all available material conditions.

These Regulations were prepared based on Act CCIV of 2011 on National Higher Education (NFTV), Government Decree 387/2012 (DR), and the Doctoral Regulations of the University of Pannonia (PE-DSZ) effective from February 27, 2023, as adopted by the Senate of the University of Pannonia on February 16, 2023, under Decision No. 38/2023 (II.16.). The general rules laid down in the PE-DSZ are not detailed here; they are only referred to. The DI-specific procedures are described in detail below. For operating principles that are identical to those described in the Doctoral Regulations of the University of Pannonia, only references will be made.

1. Basic Data of the Doctoral School

Name: Multilingualism Doctoral School (MDS)

Location of operation: University of Pannonia, Faculty of Humanities, Veszprém

Head of the DI: Dr. Judit Navracsecs, DSc, PhD, habil., university professor (linguistics)

Core Members of the DI:

1. Dr. István Cserniczkó, DSc, PhD, habil. university professor (linguistics)
2. Dr. Judit Navracsecs, DSc, PhD, habil. university professor (linguistics)
3. Dr. Ulrike Jessner-Schmid, PhD, habil. university professor (linguistics)
4. Marjolijn Verspoor, PhD, university professor (linguistics)
5. Anat Stavans, PhD, university professor (linguistics)
6. Dr. Gyöngyi Fábián, PhD, habil. university associate professor (linguistics)
7. Dr. Judit Baranyiné Dr. Kóczy, PhD, habil. university associate professor (linguistics)
8. Dr. Andrea Parapatics, PhD, habil. university associate professor (linguistics)
9. Dr. Szilvia Bátyi, PhD, university associate professor (linguistics)

2. Structure of the DI (Programs and Leaders)

The doctoral program emphasizes the linguistic and multidisciplinary investigation of multilingualism. The training is built on 3 main modules:

- **Individual Multilingualism** (Leader: Dr. Judit Navracsecs)
- **Social Multilingualism** (Leader: Dr. Andrea Parapatics)
- **Educational Multilingualism** (Leader: Dr. Szilvia Bátyi)

3. The Council of the Doctoral School

At the University of Pannonia, the tasks of the Doctoral School Council are performed by the Disciplinary Doctoral and Habilitation Council (TDHT). In accordance with the Doctoral Regulations of the University of Pannonia, the TDHT:

- a) approves the persons of doctoral topic proposers, supervisors, and instructors of the doctoral school;
- b) makes proposals for doctoral topics recommended for announcement;
- c) approves the doctoral topic of the doctoral student;
- d) performs performance evaluation during the training;
- e) establishes committees for habilitation and degree-awarding procedures, as well as for admission and complex examinations.

The TDHT is a body that assists the work of the Head of the DI and meets regularly; its members are elected by the core members of the DI, and its members are appointed and dismissed by the EDHT.

The Chairperson of the TDHT is the Head of the Doctoral School. One-third of the TDHT members, or at least two persons, must be external experts not in an employment relationship with the University. A representative of the doctoral students of the given DI participates in the work of the TDHT; they may not vote on scientific matters and issues affecting degree acquisition but have voting rights in other matters affecting doctoral students. All members of the TDHT must meet the requirements set for core members.

Chairperson: Dr. Judit Navracsecs, DSc, PhD, habil. university professor, Head of the DI

Voting Members:

1. Dr. Judit Navracsecs, DSc, PhD, habil. university professor (linguistics)
2. István Csernicskó, DSc, PhD, habil. university professor (linguistics)
3. Dr. Ulrike Jessner-Schmid, PhD, habil. university professor (linguistics)
4. Anat Stavans, PhD, university professor (linguistics)
5. Marjolijn Verspoor, PhD, university professor (linguistics)
6. Dr. Andrea Parapatits, PhD, habil. university associate professor (linguistics)
7. Dr. Judit Baranyiné Dr. Kóczy, PhD, habil. university associate professor (linguistics)
8. Dr. Gyöngyi Fábrián, PhD, habil. university associate professor (linguistics)
9. Dr. Szilvia Bányi, PhD, university associate professor (linguistics)
10. Dr. Gyula Sály, DSc, PhD, habil. university professor (theoretical medicine, SZTE) external member
11. Dr. Kata Wein, DSc, PhD, habil. university professor (linguistics, ELTE) external member

Consultative Members:

1. Dr. Gábor Kovács, PhD, habil., university associate professor (linguistics)
2. Dr. Petra Ihász, PhD, university associate professor (linguistics)
3. Dr. János Imre Heltai, PhD, habil. university associate professor (linguistics)
4. Lajos Somogyvári, PhD, habil., university associate professor (educational science)
5. Dr. Éva Forintos, PhD, university associate professor (linguistics)
6. Dr. Vera Varga, PhD, university assistant professor (psychology)

Secretary: Veronika Schrenk, secretary of the doctoral school

Elected student representative: Alexandra Gyimesi

The quorum and decision-making of the TDHT are identical to those defined for the EDHT. Beyond the above, the tasks of the TDHT extend to the matters formulated in Section 5(7) of the Doctoral Regulations.

4. Admission Procedure for Doctoral Training

The course of the admission procedure is mostly identical to that described in Section 6 of the Doctoral Regulations of the University of Pannonia. Only the differences are detailed here.

(1) Foreign citizens may also participate in the doctoral training. The doctoral school announces and conducts the doctoral training in English. Conditions regarding special admission procedures for foreign students must be set out in the call for applications.

(2) In the case of an application from a foreign student, the candidate may send the documents prescribed for the entrance examination, including the research plan, to the DI both electronically and by mail, and may request an online admission interview on the day of the admission.

(3) The entrance examination consists of an oral interview, during which the candidate reports on their scientific work, provides information on their scientific plans, and proves their proficiency in the general knowledge of the chosen thematic area and their English language skills.

(4) The evaluation criteria for the entrance examination are as follows:

- qualification of the MA-level or equivalent university degree,
- additional language skills beyond the prescribed requirements,
- professional activity (publication activity, TDK work),
- professional aptitude demonstrated at the admission interview.

The maximum achievable score is 81, of which a minimum of 42 points must be achieved for successful admission.

5. Transfer from another Doctoral School (see DSZ Section 7)

6. Order of Doctoral Training (DSZ Section 8 supplemented with specifics)

(1) People holding a degree and qualification obtained in Master's training and possessing the general and professional English language knowledge necessary for participation in doctoral training may be admitted to doctoral training. Proficiency in the language at the appropriate level may be certified by any of the following documents:

- a state-recognized, at least intermediate (corresponding to Level C1 of the Common European Framework of Reference for Languages of the Council of Europe), complex type language examination or an equivalent document;
- an international language examination listed in Annex 2 of the PE Doctoral Regulations;

- official certification of at least one year of employment spent in an English-language work environment at a foreign workplace or a multinational company;
- (2) [NFT. Section 16(1)] Doctoral training is part of the university training program, which prepares for the acquisition of a doctoral degree in training following the acquisition of a Master's degree. In doctoral training, at least 240 credits must be obtained. The training period is two times four semesters.
- (3) Doctoral students may choose from topic proposals announced by supervisors and made public on the doktori.hu website.
- (4) The doctoral student performs their studies and research under the guidance of their supervisor. The supervisor is obliged to assist the doctoral student to the best of their knowledge, but the doctoral student is solely responsible for the success and effectiveness of the research.
- (5) The doctoral student compiles their curriculum from the announced subjects according to their research topic. The subject list is coordinated with the supervisor, and the progress plan is recorded on the form available on the doctoral school's website, which is accepted by the signatures of the doctoral student and the supervisor at the beginning of each semester. In the first two semesters, 2-2 common subjects, and in the 3rd-4th semesters, 1-1 common subjects must be completed, which are mandatory for everyone, along with 3 chosen specialized subjects.
- (6) Credits can be obtained in the following distribution:
- by completing studies (60 credits);
 - by research work and annual research reports (96 credits);
 - by teaching (4 credits per semester, max. 16);
 - by publications and presentations held at conferences (minimum 44 credits).
- (7) To complete the subjects taken, the doctoral student is obliged to take an oral or written examination. The grading of the exam: excellent (5), pass (3), fail (1). Improving a failed exam may be attempted once in the same examination period. In the following semesters, uncompleted subjects may be taken again.
- (8) Enrollment for the next semester is only possible after the closure of the previous semester. A scholarship may only be received by an active student who has registered for the given semester.
- (9) The doctoral student may request the initiation of Mock exam (műhelyvita) at the earliest after the 30th month of training, if it is supported by both their supervisor and the TDHT. A student who has obtained the study and research credits prescribed as compulsory for the entire duration of the training (240 credits) and has fulfilled all their study and research obligations shall notify their intention to request their final certificate (absolutorium) in writing and submit the documents necessary for the Mock exam. Self-funded students, beyond the 60 credits obtained for study work, may also obtain the 96 credits available for research work within 2 semesters, provided the supervisor agrees. In this case, they may initiate the doctoral procedure as early as the end of the 5th semester. The doctoral student status exists alongside the maintenance of the student status; the doctoral student is obliged to enroll for the last semester by observing the regulations and deadlines. Since they have fulfilled their study obligations, they cannot be forced to collect credit points, but otherwise, they are subject to the obligations relating to students and are entitled to the rights due to students.

7. Individual Preparation (see DSZ Section 9)

8. The Degree Acquisition Procedure (see DSZ Section 10)

(1a) [NFT. Section 53(4)] The doctoral student must submit a doctoral dissertation as defined in the doctoral regulations within three years following the complex examination. This deadline may be extended by a maximum of one year in cases deserving special consideration—provided that the student is unable to fulfill their obligations arising from the student status due to childbirth, accident, illness, or other unexpected cause through no fault of their own—according to the decision of the TDHT.

9. Conditions for Obtaining the Degree (see also DSZ Section 11)

(1) [NFT. Section 53(4a)] The higher education institution issues a final certificate (absolutorium) to the doctoral student who has obtained the prescribed credits in the doctoral training.

(2) Conditions for obtaining the doctoral degree: a) fulfillment of obligations prescribed based on the doctoral regulations (total of 240 credits), successful completion of the complex examination; b) certification of knowledge of a foreign language necessary for the cultivation of the discipline with a state-recognized, complex language examination of at least intermediate level (corresponding to Level B2 of the Common European Framework of Reference for Languages of the Council of Europe) or an equivalent document, which in the case of a deaf doctoral candidate may also be done by certifying knowledge of a non-Hungarian sign language; c) presentation of independent scientific work through articles, studies, or in another way, in accordance with the regulations of the given doctoral school; minimum requirement:

- publication of one first-authored study in a foreign language in a peer-reviewed international journal, or certification of its acceptance,
- publication of one journal article or book chapter in a peer-reviewed journal or peer-reviewed edited volume, or certification of its acceptance,
- three presentations held at national or foreign professional scientific conferences, d) presentation of a dissertation; defense of the results in a public debate.

10. Complex Examination (see the document "General Principles and Rules of the Complex Exam")

(1) Students prepare for the complex examination based on a reading list—corresponding to their module. Every list contains readings approved by the TDHT and is regularly updated based on proposals from the instructors of the DI.

(2) [DR Section 12(3)] The complex examination must be taken publicly, before a committee. The committee consists of at least three members. The chairperson of the committee may only be a university professor or a habilitated associate professor in a

civil service employment relationship with the University of Pannonia. The result of the complex examination must be announced immediately after the exam. Minutes must be taken of the complex examination.

(3) The complex examination consists of two subjects related to the topic of the dissertation: a major and a minor subject. The major subject is "Multilingualism" in all cases; the minor subjects must be chosen from the 3 modules (individual, social, or educational multilingualism) offered in the training portfolio based on the proposal of the supervisor. The doctoral student must be notified in writing about the subjects, the reading list and its availability, and the date of the examination.

(4) The committee decides on the major and minor subjects separately in a closed session by secret ballot (0-1-2-3-4 points may be given). The complex examination is successful if the sum of points received reaches 60% of the achievable score for both subjects separately.

11. The Doctoral Dissertation (see DSZ Section 13)

Submission of the doctoral dissertation:

(1) [DR Section 14(2)] A condition for the submission of the doctoral dissertation is the acquisition of the final certificate (absolutorium). The 120-150 page doctoral dissertation must be submitted in the fourth year of training, at the latest within one year after the fourth year.

(2) [DR Section 14(3)] A condition for the submission of the doctoral dissertation is that the doctoral student does not have a pending doctoral degree acquisition procedure in the same discipline, or has not had an unsuccessfully concluded doctoral defense within two years. The doctoral student shall make a written declaration regarding compliance with these additional conditions upon submission of the doctoral dissertation.

(3) [DR Section 14(1)] The thesis booklet of the doctoral dissertation presents the results of independent scientific work in a summary manner. The results must be presented in a unified, self-explanatory system, with new findings presented item by item, building on the professional publications of the applicant.

(4) The dissertation may be submitted exclusively in English.

(5) If the dissertation was prepared under the guidance of a supervisor, the name of the supervisor and their proposal regarding the admission of the dissertation to defense must be indicated on the 3rd page of the dissertation. However, the dissertation may also be submitted with a negative supervisor's proposal.

(6) In order to support the candidate, the dissertation must be submitted to a workshop debate (műhelyvita)—even before its final completion. The candidate considers objections arising during the debate at their discretion. Minutes and an attendance sheet must be kept of this presentation, the debate, and the candidate's position.

(7) The doctoral dissertation must be submitted to the doctoral secretary in two identical, bound copies, along with the following:

- 1 copy of the minutes and attendance sheet of the workshop debate,
- the theses in English,
- the dissertation in electronic form,
- a curriculum vitae of maximum one page, written in the third person singular,
- a list of publications related to the topic of the dissertation, printed from MTMT,
- a declaration from the co-authors of the publications, in which they agree that the results presented in the joint publications may form part of the dissertation.

If two doctoral students are also authors in the publication, they must declare to what extent the results used in the dissertation reflect the contribution of the given candidate.

- a declaration that the dissertation is the candidate's independent work, and the literary references are clear and complete,
- a declaration from the supervisor (if any) that the dissertation complies with the norms of scientific ethics,
- the check stub certifying payment of the procedure fee.

12. Evaluation of the Dissertation (see DSZ Section 14)

(1) [DR Section 15(1)] The TDHT invites two official reviewers to evaluate the doctoral dissertation. One of the reviewers may not be in an employment-related relationship with the higher education institution operating the doctoral school.

(2) [DR Section 15(2)] The two official reviewers shall prepare a written review of the dissertation within two months—falling within the study period defined in the doctoral regulations—and declare whether they recommend its scheduling for public defense. If the proposal of one of the reviewers is negative, the TDHT shall also invite a further, third reviewer.

(3) [DR Section 17] A person may not participate as an official reviewer or committee member in the doctoral procedure who:

- is a close relative of the person concerned, or
- from whom an objective evaluation of the matter cannot be expected. Reviewers may refuse the task within 14 days due to conflict of interest or professional reasons.

(4) The identity of the reviewers must be communicated to the doctoral candidate. The author may not protest against the persons, except in cases of conflict of interest or bias. In the case of a protest by the author, the TDHT may appoint another reviewer.

(5) The review must detail the merits and flaws of the dissertation in terms of content and form, specifically addressing whether the theses are acceptable; finally, a summary proposal must be made as to whether the dissertation is acceptable as the basis for awarding the doctoral degree. Questions may be addressed to the author in the review.

(6) Reviews must be sent electronically. The secretary of the doctoral school enters the necessary data (names of reviewers, proposal, dates) on the third page of the dissertation. One copy of each review must be handed over to the author, who is obliged to respond to them in writing. The candidate is obliged to submit the written response electronically in PDF format to the secretary of the doctoral school. The public debate of the dissertation must be scheduled within two months from the receipt of the two supporting proposals and the responses given to the reviews.

13. Public Debate of the Dissertation (see DSZ Section 15)

(1) [DR Section 16(1)] The doctoral dissertation must be defended in a public debate before an examination committee (hereinafter: Committee), even in an online form.

(2) [DR Section 16(3)] The dissertation must be put to public debate within two months falling within the study period from the receipt of the two supporting proposals. The submitter of the doctoral dissertation receives the reviews in advance and responds to

them in writing before the defense, and orally—in the public debate—during the defense.

(3) [DR Section 16(2)] The TDHT establishes a Committee for conducting the public debate, for decision-making regarding the acceptance of the dissertation, and for evaluating the public defense. The Committee consists of at least five members; the provisions of Section 12(1) must be applied when selecting members.

(4) The doctoral school also designates a substitute chairperson and two substitute members. All members of the Committee must hold a scientific degree. The candidate's supervisor and persons who have published jointly with the candidate on the doctoral topic may not be members of the Committee. The two reviewers of the dissertation are also members of the committee.

(5) The candidate, all members of the TDHT, and the professionally relevant departments of the University must be notified of the date of the public debate at least 5 working days before the date of the debate. The doctoral school publishes the date of the debate on the ODT website. The notifications must state that anyone may speak in the public debate and may also make comments in writing beforehand. The doctoral defense may be conducted if the chairperson and three members (at least one reviewer and one external member, who may be the same person) are present. If one of the reviewers is unable to participate in the defense, they must declare in writing their acceptance of the response given by the candidate to the review prior to the defense. At the defense, the review of the absent reviewer and the candidate's response shall be presented by the secretary.

(6) It must be ensured that the members of the Committee gain insight into the reviews and responses prior to the public debate.

(7) The language of the public debate is English.

(8) During the debate, it is the candidate's duty to present the main results of the work performed, the theses, in a short free presentation (20 minutes). Thereafter, the reviewers present their opinions, then the candidate responds to the questions and comments posed by the reviewers and the participants of the public debate. Finally, the reviewers and participants declare whether they accept the candidate's response.

(9) [DR Section 16(5)] After the closure of the debate, the committee decides on the acceptance of the dissertation in a closed session by secret ballot. The Committee decides on the result of the defense by scoring (0-1-2-3-4 points). The opponents also participate in the scoring. The dissertation is considered accepted if the sum of points received reaches 60% of the achievable score. The chairperson then announces the result publicly.

(10) [DR Section 16(6)] Minutes must be taken of the defense and the committee's decision. Upon request, the higher education institution issues a certificate of the result of the defense, indicating therein that the certificate does not mean the awarding of the doctoral degree.

(11) [DR Section 16(4)] At the request of the submitter of the doctoral dissertation, based on the supporting opinion of the Committee and with the approval of the TDHT, a closed defense may be held if the doctoral dissertation is affected by a patent procedure or contains classified data for national security reasons.

(12) [DR Section 16(7)] In the case of two rejecting reviews or an unsuccessful defense, the submission of a new doctoral dissertation on the same doctoral topic may be initiated at the earliest after two years, on at most one occasion.

14. Classification of the Doctoral Degree (see DSZ Section 16)

- (1) The TDHT prepares a motion for the EDHT based on the minutes.
- (2) The EDHT decides on the awarding of the degree by a yes/no vote.
- (3) The classification of the doctoral degree is determined based on the percentage result of the defense. The classification of the degree is "summa cum laude" (excellent) in the case of 90% or higher, "cum laude" (good) in the case of less than 90% and at least 80%; for a "rite" (passed) classification, at least 60% must be achieved.
- (4) One copy of the successfully defended doctoral dissertation, together with the reviews and responses, must be placed cataloged in the Central Library of the University. A further 1 copy is placed and preserved at the DI.
- (5) [NFT Section 53(6)] A central register must be kept of awarded doctoral degrees, which anyone may inspect. Internet accessibility of the register must be ensured.
- (6) [NFT Section 53/A(1)] The doctoral dissertation—and its theses—are public for everyone. Making them public may be postponed at most until the date of publication of the patent or protection application. The higher education institution ensures the registration and full public disclosure of the dissertation and theses in electronic and printed form, placing one printed copy and one electronic copy in the central library.
- (7) [NFT Section 53/A(2)] The doctoral dissertation and its theses must be made accessible to everyone in electronic form in the Database, provided with an identifier (DOI) corresponding to generally accepted international practice.

15. Financial Conditions of Doctoral Training and Degree Acquisition

DSZ Section 23. State and Institutional Grants and Benefits, Fees and Charges

- (1) [NFT Section 47(2)] The support period for a student participating in doctoral training is a maximum of eight semesters. (1a) According to Section 114/D(1)(b) of the NFTV, the support determined per person for participants in doctoral training is: a) 1,680,000 HUF/year in the training and research phase, b) 2,160,000 HUF/year in the research and dissertation phase, c) a one-time payment of 400,000 HUF in the case of successful degree acquisition during doctoral training, which must first be applied to students establishing a student status in the first semester of the 2016/2017 academic year.
- (2) State doctoral scholarships may be received by: a) students of Hungarian citizenship, b) foreigners subject to the same assessment based on legislation or international agreement. The monthly amount is determined in the prevailing budget act. A student who does not fulfill the requirements of their work plan in two consecutive semesters may be reclassified to self-funded training upon the proposal of the TDHT.
- (3) Payment must take place by the 10th of each month (except enrollment months).
- (4) State scholarship holders do not pay enrollment fees and are exempt from the issuance fee for the first PhD diploma.
- (5) Upon request, doctoral students may receive hostel placement or housing support.
- (6) No scholarship is paid during the suspension of the student status.

DSZ Section 24. Charges and Fees Payable by Doctoral Students

- (1) Non-scholarship doctoral students pay a tuition fee (cost reimbursement), determined by the Faculty Council of the Faculty of Humanities and made public by the DI by May 31.
- (2) The fee must be paid in one sum per semester (by Oct 31 and March 31).
- (3) Failure to pay prevents enrollment or issuance of a final certificate. Late payment requires a separate procedure fee.
- (4) A doctoral student may request the postponement of the payment once per semester until the start of the next semester. The Head of the DI decides on this.
- (5) An annex provides for the degree acquisition procedure fee.
- (6) Procedural fees apply for missing administrative deadlines or replacing lost documents.
- (7) Services for state-supported students include first-time taking of lectures/exams, one retake of failed exams, final examinations, and the degree procedure during the student status.

DSZ Section 25. Honoraria for Degree Acquisition

- (1) Reimbursement of costs may be paid to external members; external reviewers may receive remuneration based on a contract.
- (2) Honoraria amounts are determined by the Faculty with the Chancellor's agreement.

Appendix

JELENTKEZÉSI ADATLAP APPLICATION FORM

„A” PhD Képzés / PhD Training:

- állami ösztöndíjas / state-funded scholarship
- egyéb ösztöndíjas / other scholarship types
- önköltséges / fee-paying

„B” Egyéni felkészüléssel fokozatszerzésre

- individual training for obtaining the PhD degree

A megfelelő négyzetben jelölje / Put an X into the appropriate box.

I. Személyi adatok / Personal data

családi név / family name:

.....
